PROJECTS

E-Commerce Website

📅 04/2024 - 07/2024 📍 Pune, India

- Developed a fully functional e-commerce platform utilizing React for component-based architecture, JavaScript for core logic, and Tailwind CSS for rapid UI development
- Implemented core e-commerce features including product catalog management, user authentication and authorization, shopping cart functionality, secure checkout process, order management, and inventory tracking
- Ensured optimal user experience through responsive design, intuitive navigation, and performance optimization, resulting in increased user engagement and conversion rate
- Designed an intuitive user interface with clear and visually appealing displays of weather information, enhancing user experience

Weather Detector

📅 11/2023 - 01/2024 📍 Pune, India

- Developed a user-friendly weather application that provides real-time weather updates, forecasts, and location-based information
- Integrated weather API to fetch accurate and up-to-date weather data, including temperature, humidity, wind speed, and weather conditions
