- BE- Electrical Engineering
KCES COEIT, Jalgaon
2016-2019
- Diploma- Electrical Engineering
SGD Polytechnic, Jalgaon
2013-2016

Objective

Highly skilled React Developer with 4 years of experience in developing front-end applications. Proficient in collaborating with back-end teams, implementing automated testing platforms, and optimizing components for maximum performance. Committed to staying up-to-date with emerging technologies and frameworks, and reducing development time for new projects.

Professional Experience

Yugensys Software LLP

Jan-2023 – Present

Project Description:

Developed a comprehensive user interface for the product management team of an e-commerce platform. Implemented functionalities to add, edit, delete, and list all products, enhancing the efficiency and usability of the product management process.

Responsibilities:

- Collaborate with UX team to implement designs.
- Develop reusable components like data grids and dialog boxes.
- Create responsive web apps using Bootstrap and Material UI.
- Design pages with React Router for navigation.
- Use React hooks for state and lifecycle management.
- Manage source control with Git and package management with npm.
- Follow Scrum methodology and track progress with Jira.
- Perform end-to-end testing and component testing.

Aris Global

Jan-2021 – Dec-2022

Project Description:

Developed a web-based medical information system using React.js, improving data accessibility and management for healthcare professionals.

Responsibilities:

- Develop responsive and interactive user interfaces.
- Write clean, efficient, and reusable code.
- Bug fixing and performance issues
